PROFESSIONAL SUMMARY

Entry-level Python Backend Developer with a problem-solving mindset, focused on building clean and functional web applications. Hands-on experience in server-side logic, authentication workflows, and database-driven projects, including a knowledge tracking system (EduTrack). Seeking an internship to contribute, learn industry practices, and grow as a backend engineer.

SKILLS

Programming Language: Python

Backend Framework: Flask

Database: PostgreSQL, SQLAlchemy ORM, MySQL

Web Technologies: HTML, CSS, Jinja 2

Concepts: Authentication, Authorization, Session Management, OTP Verification, Email Verification

Tools: Git, GitHub, VS Code, PyCharm, Render

PROJECTS

EduTrack

- Built a comprehensive Flask-based student knowledge tracking system with secure authentication and personalized dashboards.
- Designed course management and habit monitoring modules with automated learning progress tracking.
- Calculated real-time study hours, habit completion rates, and course progress percentages based on daily commitment limits.

Flask Authentication System

- Engineered a secure Flask authentication system with user registration, login, password recovery, and email verification.
- Integrated OTP-based verification, password hashing, secure sessions, and protected routes for reliable account security.
- Enabled profile management with image upload, password updates, and personalized account settings.

Expense Tracker

- Created a Flask-based expense tracker with categorized expense records and database integration.
- Implemented CRUD operations to efficiently manage and monitor daily expenses.

EDUCATION

Bachelor of Arts (BA)

Bundelkhand University, Jhansi

Expected Graduation: 2026
